

# NovaBACKUP Cloud for MSPs

Grow your customer base with a centrally monitored and cost-effective BDR solution

## HIGHLIGHTS

### NOVABACKUP Version 19 for MSPs

- ✓ **Image to VHDX for Virtual Recovery**  
Ability to create an image directly into VHDX format, which means your image backups can now be directly used as a Hyper-V machine within minutes.
- ✓ **Performance Improvements**  
Improved performance of import and restore operations for file-based backups.
- ✓ **Increased Speeds**  
Increased speeds when scanning, indexes are now stored with backup media. Imports now take only minutes.
- ✓ **Updated Systems and UI**  
Updated image backup system and released a new CMon web-based user interface.

## We have the tools your business needs to succeed

### Cloud and Backup Monitoring

Keep track of all your customers' applications with Remote Central Monitoring and User Account Management. Stay one step ahead of ransomware and other data threats.

### Local and Off-site Backup

Two cloud storage options (NovaBACKUP Hosted or self-hosted) plus unlimited and free local backup. Hardware agnostic.

### Simple Billing and Pay-Per-Use Model

NovaBACKUP for MSPs is account based, which means no need to track license keys. Plus, you pay only for what you use.

### Setup and Training Included. Unlimited Phone Support

NovaBACKUP is an MSP-friendly software provider. Our team has decades of experience in the MSP realm.

### Windows Data Protection

Full protection of Windows systems, plus support for virtual machines, Microsoft SQL and Exchange.

### Backup and Disaster Recovery (BDR)

Your image backups can be directly mounted by a Hyper-V machine within minutes. Bring up a backup copy of a machine if disaster strikes.

### All-in-One Solution

Automated backups, email notifications, file and image backups, incremental, differential and copy, compression, encryption, bare metal restore and built-in P2V. HIPAA, FERPA and GLBA compliant.
